

Did you know

JANUARY 2015

PRECAST Light Pole Bases

- > Mass quantity set per day (24) – no cure time on-site
- > Quantity controlled in a stable environment – no weather delays
- > Limited manpower with top of the line forms – no need for a designated crew
- > Smooth uniform finish – uniform look on jobsite

WHY DO THIS?

Exposed to inclement weather, light pole cages can cause rusting and damage. This can lead to product damage, higher costs and production delays.

At Lindsay Precast, we manufacture our light poles within a controlled environment, removing any unplanned weather influences altogether. By choosing precast you are given complete control when the finished product arrives on-site and ready to be set in the ground. No more waiting on concrete trucks to arrive.
